DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Gaines et al. (US 4,953,232). Gaines et al. (hereinafter Gaines) discloses a collar protector (10) formed of a disposable planar material, col. 2, lines 9-11 that has an outer collar member (24) with configuration corresponding to a garment collar (18) which is longitudinally foldable to overlie the garment collar as shown in figures 2 and 3. Furthermore, an underlying member (22) being formed integrally with the collar member at a segment of an edge thereof to extend downwardly beneath an inner surface (16) of a garment, col. 2, lines 18-25 and as shown in figure 2. Additionally, the collar protector has an inner surface thereof with an adhesive coating (28) to maintain the protector onto the garment collar, col. 2, lines 44-47.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gaines.

With regard to claim 3, it would have been obvious that the collar protector of Gaines can be made of any desired material that was available at the time the device was made.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
